

# FAIRBANKS MORSE TEN-POINT INSPECTION

**Reduce unplanned downtime and optimize your engine's performance with a Fairbanks Morse ten-point inspection performed by experienced, OEM factory-certified technicians.**

A Fairbanks Morse ten-point inspection is a great way to quickly assess your engine's condition and detect issues before they become major budget concerns. A Fairbanks Morse Factory-Certified OEM technical representative will come onsite to thoroughly inspect several critical points on the engine. The inspection typically takes 2-3 days per engine, so you can get the information you need right away. Fairbanks Morse will partner with you to build a long-term plan if additional maintenance is required. At Fairbanks Morse, we believe leading power systems should be backed by world-class product support. That's why we've assembled one of the industry's largest teams of technicians and established the most rigorous certification standards.
