

Environmental Management Policy Statement

Fairbanks Morse Engine is committed to operating our business in a responsible manner to protect the environment. It is our policy to prevent pollution, reduce unnecessary waste, and safeguard the environment in the communities where we operate our business.

We will attain a high standard of an environmental management system by adhering to these principles:

- Implement programs and procedures to:
 - Comply with federal, state, and local environmental laws and regulations.
 - Comply with customer contractual requirements which relate to our environmental aspects.
 - Ensure our employees will be given appropriate training regarding their role and responsibility as part of our environmental compliance programs.
- Implement and maintain management systems and procedures designed to eliminate or minimize risk factors associated with our business that would pose a hazard to the environment. We will implement policies, procedures, and technology to be prepared for prompt response to a hazardous emergency.
- Review our goals, objectives, and performance periodically and strive for continual improvement as a company.

Kenneth Wade EHS Director is hereby appointed as FME's Environmental Management Representative (EMR) for our ISO 14001 certification.

Michael Clark
President and COO, Fairbanks Morse Engine
